

KASSYM YERMAKHANBET

FULL-STACK & AI PRODUCT ENGINEER

Astana, Kazakhstan · Remote worldwide · +7 708 145 9577 · honormorethangold@gmail.com

[Portfolio](#) | [GitHub](#) | [LinkedIn](#) | [Upwork](#)

Full-stack and AI product engineer with 4+ years of experience delivering customer-facing SaaS, internal platforms, self-hosted CMS/CRM systems and production-shaped AI infrastructure. Owns work from product discovery and UX through typed APIs, deployment, observability and SEO. Recent work spans a Wix-like website builder, an AI-assisted proposal-to-invoice SaaS, multilingual conversion websites, and RAG/LLM systems. Available for remote product engineering and high-impact contract work.

CORE CAPABILITIES

Product & frontend	TypeScript, React, Next.js, Vite, Vue 3, responsive UI systems, UX implementation
Backend	Python, FastAPI, Node.js/Express, Go, SQLAlchemy 2.0, REST, WebSocket, async services
AI & retrieval	RAG, pgvector HNSW, Ollama, embeddings, reranking, eval harnesses, LLM gateways
Cloud & delivery	Docker, Nginx, AWS Lambda/S3/SQS/DynamoDB, Terraform, GitHub Actions, Prometheus
Data	PostgreSQL, Redis, MongoDB, MySQL, IndexedDB
Commercial delivery	CMS/CRM, multilingual sites, on-page SEO, analytics, lead funnels, e-signatures

SELECTED PRODUCTS & CLIENT WORK

Seven Hills Intelligence Site Builder & CRM · Lead Full-Stack Developer · React / Node.js / Docker

Built a self-hosted Wix-like CMS/CRM with a drag-and-drop canvas, smart guides, 30+ widgets, reusable design tokens, responsive device styles, version history, dynamic collections, 26-language content translation, leads, support chat, analytics, audit logs, scheduled publishing, SEO prerender and backups. Designed for private and offline networks.

ProposalFlow · Full-Stack SaaS Product · 2026

Built a proposal-to-invoice workflow for freelancers and agencies: AI-assisted structured drafts, branded client links, approvals, e-signatures, invoices, payment-method handoff, client activity and subscription tiers. Delivered the public product, demo, pricing and account workflow.

Olzhas Stroy · Commercial Website · Next.js / SEO / UX

Created a premium RU/KZ/EN sales website for an Astana renovation company with a pricing calculator, WhatsApp conversion flow, 46 video case studies, 27 galleries and 352 real project photos. Added dedicated SEO pages, structured metadata, sitemap and Google Search Console, then deployed to the client domain and server.

Open-source AI & cloud portfolio · FastAPI / RAG / AWS / Go

Shipped citation-grounded RAG with pgvector and reproducible evaluation, an OpenAI-compatible LLM gateway with Redis rate limiting and cost accounting, and a Terraform-defined AWS ingest pipeline using S3, SQS, Lambda and DynamoDB.

PROFESSIONAL EXPERIENCE

Software Development Specialist | Seven Hills LLP

Jan 2025 - Jun 2026 · Astana, Kazakhstan

- Built and deployed the Seven Hills self-hosted visual CMS/CRM, including the editor, Node/Express API, persistent content layer, nginx edge and Docker Compose operations.
- Delivered real-time geolocation and operational dashboards using WebSocket fan-out and interactive maps for teams working across multiple regions.
- Designed OSINT tools for IP, DNS and WHOIS enrichment plus async CIDR scanning, supporting authorized investigative workflows.
- Integrated LLM features and standardized typed Python, Docker multi-stage builds, CI and measurable retrieval/evaluation workflows.

Software Developer | Ministry of Internal Affairs of Kazakhstan

Jun 2022 - Dec 2024 · Astana, Kazakhstan

- Designed and developed a custom CRM system that reduced manual processing across internal departmental workflows.
- Built full-stack applications with role-based access control for sensitive data and migrated legacy components to a modern stack.
- Maintained production systems under government security and data-protection requirements.

SELECTED OPEN-SOURCE ENGINEERING

- **rag-docs** — FastAPI + pgvector HNSW retrieval, citation-grounded answers, optional cross-encoder reranking and a 25-question evaluation harness.
- **llm-gateway** — OpenAI-compatible gateway with API-key authentication, atomic Redis rate limiting, caching, provider fallback, SSE streaming, usage accounting and Prometheus metrics.
- **aws-serverless-ingest** — Terraform-defined S3 → SQS → Lambda → DynamoDB pipeline with a dead-letter queue, partial-batch retries, least-privilege IAM and moto-based tests.
